

Gronda Metrics Board

| Name | Date Created | Estimative (h) | Milestone | Status | Tags | Team |
|---|---------------------------|----------------|-----------------|------------|---------------------------|-----------|
| <u>Planning</u> | @August 15, 2021 2:36 AM | | | Milestones | | Tech-lead |
| <u>API</u> | @August 15, 2021 2:37 AM | | | Milestones | | Back-end |
| <u>Client Library</u> | @August 15, 2021 2:37 AM | | | Milestones | | Front-end |
| <u>Recruitment Platform</u> | @August 15, 2021 2:37 AM | | | Milestones | | Front-end |
| <u>AWS</u> | @August 15, 2021 2:37 AM | | | Milestones | | Back-end |
| <u>Auth</u> | @August 16, 2021 12:08 AM | | | Milestones | | Back-end |
| <u>Monitoring</u> | @August 16, 2021 12:18 AM | | | Milestones | | Back-end |
| <u>Check the performance of DynamoDB and Aurora (MySQL).</u> | @August 15, 2021 2:38 AM | 1 | <u>Planning</u> | Done | database spike | Tech-lead |
| <u>Check prices of DynamoDB, SQS and Aurora (MySQL) usage</u> | @August 15, 2021 3:04 AM | 0.5 | <u>Planning</u> | Done | cost database spike | Tech-lead |
| <u>Create the data model of Gronda Metrics API</u> | @August 15, 2021 3:06 AM | 1 | <u>Planning</u> | Done | database doc | Tech-lead |
| <u>List endpoints for the API</u> | @August 15, 2021 3:06 AM | 1 | <u>Planning</u> | Done | doc | Tech-lead |
| <u>Create payload interfaces of each endpoint</u> | @August 15, 2021 3:06 AM | 0.5 | <u>Planning</u> | Done | development doc | Tech-lead |

|  Name |  Date Created |  Estimative (h) |  Milestone |  Status |  Tags |  Team |
|---|--|--|---|--|--|--|
| <u>Create the auth service to generate a valid JWT Token to access the Gronda Metrics API</u> | @August 16, 2021 12:15 AM | 16 | <u>Auth</u> | To Do | development | Back-end |
| <u>Create the authorizer to validate de JWT Token received from the request</u> | @August 16, 2021 12:10 AM | 4 | <u>Auth</u> | To Do | development | Back-end |
| <u>Create lambda function to endpoint: POST /event</u> | @August 15, 2021 3:06 AM | 4 | <u>API</u> | To Do | development | Back-end |
| <u>Create lambda function to endpoint: GET /event</u> | @August 15, 2021 3:06 AM | 4 | <u>API</u> | To Do | development | Back-end |
| <u>Create lambda function to endpoint: PUT /event-setup</u> | @August 15, 2021 3:06 AM | 4 | <u>API</u> | To Do | development | Back-end |
| <u>Create lambda function to endpoint: GET /event-setup/{event}</u> | @August 15, 2021 3:06 AM | 4 | <u>API</u> | To Do | development | Back-end |
| <u>Create a client library to request the events to Gronda Metrics API</u> | @August 15, 2021 3:06 AM | 8 | <u>Client Library</u> | To Do | development | Front-end |
| <u>Implement all necessary tracking events in the recruitment platform using the client library</u> | @August 15, 2021 3:06 AM | 16 | <u>Recruitment Platform</u> | To Do | development | Front-end |

|  Name |  Date Created |  Estimative (h) |  Milestone |  Status |  Tags |  Team |
|---|--|--|---|--|--|--|
| <u>Create Database in AWS</u> | @August 15, 2021 3:06 AM | 0.5 | <u>AWS</u> | To Do | database devops | Back-end |
| <u>Create new secret in AWS Secret Manager with the database credentials</u> | @August 15, 2021 3:06 AM | 0.5 | <u>AWS</u> | To Do | devops secret | Back-end |
| <u>Create DNS in Route53</u> | @August 15, 2021 3:06 AM | 0.5 | <u>AWS</u> | To Do | devops dns | Back-end |
| <u>Create Apache Kafka service on AWS</u> | @August 16, 2021 12:08 AM | 3 | <u>AWS</u> | To Do | devops | Back-end |
| <u>Create the Apache Kafka Consumer to store the data in the database</u> | @August 16, 2021 12:15 AM | 8 | <u>API</u> | To Do | development | Back-end |
| <u>Deploy all lambda functions to AWS (API, Authorizer, Auth service and Kafka Consumer)</u> | @August 15, 2021 3:06 AM | 3 | <u>AWS</u> | To Do | deploy devops | Back-end |
| <u>Set up necessary permissions to lambda functions</u> | @August 15, 2021 3:06 AM | 2 | <u>AWS</u> | To Do | devops | Back-end |
| <u>Create API Gateway with all endpoints of the Gronda Metrics API and the authorizer setup</u> | @August 15, 2021 3:06 AM | 1 | <u>AWS</u> | To Do | devops | Back-end |
| <u>Deploy the recruitment platform</u> | @August 15, 2021 3:06 AM | 1 | <u>AWS</u> | To Do | deploy devops | Back-end |

|  Name |  Date Created |  Estimative (h) |  Milestone |  Status |  Tags |  Team |
|---|--|--|---|--|--|--|
| <u>Create alerts with the logs stored in Cloudwatch to monitor the application's health</u> | @August 16, 2021 12:17 AM | 3 | <u>Monitoring</u> | Backlog | devops monitoring | Back-end |
| <u>New Task</u> | @August 15, 2021 2:18 AM | | | | | |
| <u>Untitled</u> | @August 15, 2021 8:38 PM | | | | | |
